OLUWATOBILOBA AGBEJULE

FRONTEND & SOFTWARE DEVELOPER | REACT, NEXT.JS & JAVASCRIPT

Ibadan, Oyo, Nigeria | +234 708 571 0513 | agbejule.dev@gmail.com | GitHub | LinkedIn

Open to worldwide remote roles and relocation opportunities

PROFESSIONAL SUMMARY

Frontend and software developer with three years of hands-on project experience building responsive React and Next.js products, dashboards, authentication workflows, business systems, and a blockchain-backed certificate verification platform. Former Frontend Team Lead for Cowrywise LAUTECH Campus, with experience coordinating delivery, supporting developers, integrating APIs, debugging, testing, and deploying production-ready applications.

TECHNICAL SKILLS

Frontend:	JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, responsive design
React Ecosystem:	React Router, Redux Toolkit, Hooks, Context API, reusable component architecture
Backend & Data:	REST APIs, Node.js, Express.js, MySQL, PostgreSQL, Supabase, Firebase Authentication
Web3 & Delivery:	Solidity, Hardhat, ethers.js, Polygon, Git, GitHub, Vite, Vercel, Railway, testing, debugging

EXPERIENCE

Independent Frontend & Software Developer | *Nigeria* **2023 - Present**

- Build and deploy responsive web applications, dashboards, enrollment systems, e-commerce experiences, blockchain verification tools, and business platforms from requirements through release.
- Develop reusable components, authentication flows, shared state, validated forms, REST API integrations, databases, and reliable loading and error states; troubleshoot browser, backend, build, deployment, and SPA-routing issues.

Frontend Team Lead | *Cowrywise LAUTECH Campus* **2025**

- Led frontend planning and task coordination for campus initiatives, helping teammates translate requirements and designs into responsive web implementations.
- Reviewed interface work, supported debugging and Git collaboration, and helped maintain consistent delivery standards across the frontend team.

Volunteer Technical Support & Peer Mentoring | *LAUTECH Student Projects* **2024 - 2026**

- Provided unpaid frontend guidance, debugging support, Git assistance, and practical technical explanations to students working on academic and portfolio projects.

SELECTED PROJECTS

CertChain Nigeria - Blockchain Certificate Verification System | GitHub | *Node.js, MySQL, Solidity, ethers.js* **2026**

- Built a full-stack platform for Nigerian universities to register and verify academic certificates using secure admin access, QR codes, REST APIs, database persistence, and blockchain-backed records.

AVUNA (In Progress) | GitHub | *Next.js, TypeScript, Supabase, Tailwind CSS* **2026**

- Developing a verified public-help platform for Nigerians to discover reviewed resources and emergency contacts, save information, submit reports, and support secure admin review workflows.

CloudEHR NG | Live | *React, Authentication, Vercel* **2026**

- Developed and deployed an academic healthcare workflow platform spanning patient, administrative, and digital-record experiences; validated core behaviour with 68 passing tests and 370 assertions.

KodeCamp Stage 6 E-Commerce Application | GitHub | *React, Redux Toolkit, Firebase Auth* **2026**

- Built a responsive multi-page storefront with reusable components, product and account flows, protected routes, shared state, validated forms, and deployment-ready SPA routing.

KodeCamp Enrollment Portal | GitHub | *React, Forms, Authentication, Vercel* **2026**

- Created a responsive registration and administration workflow with structured forms, reusable UI, authentication-related functionality, and production deployment.

EDUCATION

Ladoke Akintola University of Technology (LAUTECH), Ogbomoso, Nigeria **2026**

Bachelor of Technology (B.Tech.), Science Laboratory Technology
